

As we all know there are three segments available in NSE India.

1. NSE EQ (Cash Segment)
2. NSE FnO (Futures and Options Segment) also known as Equity Derivatives Segment.
3. NSE Currency (CDS)

Currently, we are providing NSE FnO Segment only.

There is No Continuous Futures in NSE feed, it's just created (**By the Data Vendor**) for the convenience of technical traders.

In Pix Connect you will get the three types of symbols

1. Continuous Futures
2. Contract Futures
3. Options - Weekly and Monthly

Let's understand all three formats.

1. Continuous Futures: -

We are using _I (Under Score Eye) for continuous contract futures.

E.g:- Three Months of Contract as below.

First Month Contract= _I

NIFTY = **NIFTY_I** BANKNIFTY = **BANKNIFTY_I** TCS = **TCS_I** RELIANCE
= **RELIANCE_I** SBIN = **SBIN_I**

Second Month Contract= _II

NIFTY = **NIFTY_II** BANKNIFTY = **BANKNIFTY_II** TCS = **TCS_II** RELIANCE
= **RELIANCE_II** SBIN = **SBIN_II**

Third Month Contract = _III

NIFTY = **NIFTY_I** BANKNIFTY = **BANKNIFTY_III** TCS = **TCS_III** RELIANCE
= **RELIANCE_III** SBIN = **SBIN_III**

2. Contract Future and 3. Options (Weekly and Monthly) Table

DD-MM-YY

Symbols Type	Symbols Name	Ticker price	DD (Date)	MM (Month)	YY (Year)	Call or Put	Symbols Name
Contract Futures	NIFTY	-	-	JUL	19	-	NIFTYJUL19
Monthly Options	NIFTY	11500	-	JUL	19	CE	NIFTY11500JUL19CE
Weekly Options	NIFTY	11500	18	JUL	19	PE	NIFTY1150018JUL19PE

Let's see some examples to understand the different between these all formats.

1. Contract Futures: -

E.g:- NIFTYJUL19

Here you will find three attributes (Symbol Name- MM-YY) (NIFTY-JUL-19).

Attributes are: -

1. **Symbol Name**- Ticker or Script Name as per NSE (NIFTY)
2. **MM (Month)**- First three word of JULY (JUL)
3. **YY (Year)**- Last two digits of 2019 (19)

Other E.g:-

1. BANKNIFTYJUL19
2. TCSJUL19
3. SBINJUL19

Symbols Type	Symbols Name	Ticker price	DD (Date)	MM (Month)	YY (Year)	Call or Put	Symbols Name
Contract Futures	NIFTY	-	-	JUL	19	-	NIFTYJUL19

2. Options

In NSE you would have the two type of Options. **1. Monthly Options** and **2. Weekly Options**

1. Monthly Options

Symbols Type	Symbols Name	Ticker price	DD (Date)	MM (Month)	YY (Year)	Call or Put	Symbols Name
Monthly Options	NIFTY	11500	-	JUL	19	CE	NIFTY11500JUL19CE

E.g:- **NIFTY11500JUL19CE**

Here you will find the five attributes which would be **(Symbol Name- Strike Price- MM- YY)** (**NIFTY - 11500 - JUL - 19 – CE**) to create the monthly options symbol.

Attributes are: -

- 1. Symbol Name-** Ticker or Script Name as per NSE (**NIFTY**)
- 2. Strike -** Strike Price for that symbol (**11500**)
- 3. MM (Month)-** First three word of JULY (**JUL**)
- 4. YY (Year)-** Last two digits of 2019 (**19**)
- 5. CE-** Represent the type of Options (It would be Call Options or Put Options) (**CE**)

2. Weekly Options

Weekly Options only available in NIFTY and BANKNIFTY script.

Symbols Type	Symbols Name	Ticker price	DD (Date)	MM (Month)	YY (Year)	Call or Put	Symbols Name
Weekly Options	NIFTY	11500	18	JUL	19	PE	NIFTY1150018JUL19PE

E.g:- **NIFTY1150018JUL19PE**

Here you will find six attributes which would be **(Symbol Name- Strike Price-DD-MM-YY-PE)** (**NIFTY - 11500 - 18 - JUL - 19 - PE**) to create the Weekly options symbol.

Attributes are: -

- 1. Symbol Name-** Ticker or Script Name as per NSE (**NIFTY**)
- 2. Strike -** Strike Price for that symbol (**11500**)
- 3. Date-** Expiry Date (Every Thursday is the weekly Expiry in NSE, except last week of the month) (**18**)
- 4. MM (Month)-** First three word of JULY (**JUL**)
- 5. YY (Year)-** Last two digits of 2019 (**19**)
- 6. PE-** Represent the type of Options (It would be Call Options or Put Options) (**PE**)

This is all for symbology of Pix Connect App. Please download all symbols for the Download page in our website.

Hope this article help you to understand the symbology of Pix Connect.

Thank You and Happy Trading !
